

Goggle clip hook replacement - Trooper 2Vi and Grimmir 2Vi helmets

To change the goggle clip hook follow the instruction below.

1. Remove the old goggle clip hook by unclipping the two parts of the hook and then slide off the front part from the strap

2. Push the new front part on the strap. Make sure it is the correct way as shown below. It might be a bit tight so try to slide it in sideways and wiggle it through. Make sure the pins are aligned on the holes. Clip the new hook so that the two parts are assembled around the strap. All done!
